

The **TECNICO** Forklift:

Just one more example of the most versatile machine/attachment combination in the industry.

You'll never appreciate how useful a forklift is until you own one. Once you do, you'll wonder how you ever lived without it. Move pallets, bales of hay, or heavy logs. Use it in the shop to safely lift and move heavy items. And with an Antonio Carraro tractor, take your forklift off-road where you never before could venture.

There's no need to spend big money on a dedicated forklift. A

forklift mast on your Antonio Carraro tractor by Tecnico attaches to your three point hitch as easily as any three point attachment. When not in use, store it in the corner of the shop.

Tecnico forklifts have adjustable fork widths, greaseless telescoping booms, and dual side hydraulic cylinders for excellent visibility while working.

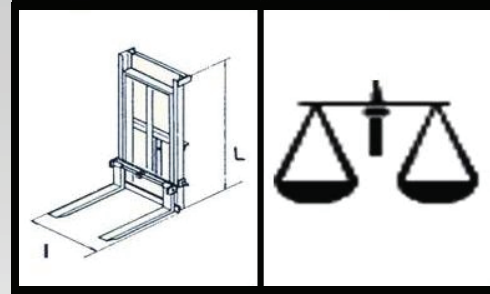

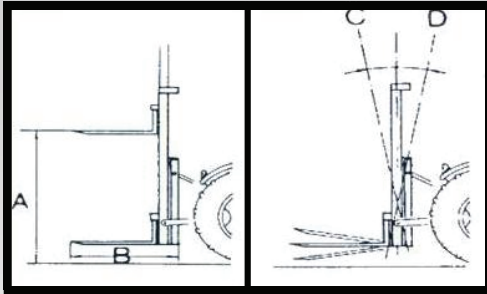

Available in multiple sizes to meet your application requirements, a Tecnico forklift will become one of your most-used attachments.

Hi-Visibility Forklift

TECNICO

Partners, LLC

Specifications
